Information about Copyrighted Content

Some instruments administered for studies archived with ICPSR may contain in whole or substantially in part contents from copyrighted instruments. Reproductions of the instruments are provided as documentation for the analysis of the data associated with this collection. Restrictions on "fair use" apply to all copyrighted content. More information about the reproduction of copyrighted works by educators and librarians is available from the United States Copyright Office.

NOTICE
WARNING CONCERNING COPYRIGHT RESTRICTIONS

The copyright law of the United States (Title 17, United States Code) governs the making of photocopies or other reproductions of copyrighted material. Under certain conditions specified in the law, libraries and archives are authorized to furnish a photocopy or other reproduction. One of these specified conditions is that the photocopy or reproduction is not to be "used for any purpose other than private study, scholarship, or research." If a user makes a request for, or later uses, a photocopy or reproduction for purposes in excess of "fair use," that user may be liable for copyright infringement.

ICPSR PROCESSING NOTES FOR #38034
ANES 2020 Time Series Study

1. **Incomplete Value Label:** These data were deposited with incomplete value labels in labeled numeric variables. To fix this, ICPSR added the following labels:
 - **V201545:** -1 '-1. Inapplicable'
 - **V201591:** -1 '-1. Inapplicable'
 - **V202366:** -8 '-8. Don't know'
 - **V202498X:** -2 '-2. Data not yet available'
 - **V202499X:** -2 '-2. Data not yet available'
 - **V202500X:** -2 '-2. Data not yet available'
 - **V202501X:** -2 '-2. Data not yet available'
 - **V202502X:** -2 '-2. Data not yet available'
2. **Additional Information:** For additional information on the ANES 2020 Time Series Study, please visit the [American National Election Studies](#) website.

ANES 2020 Time Series Study

Variable Description and Frequencies

Note: Frequencies displayed for the variables are not weighted. They are purely descriptive and may not be representative of the study population. Please review any sampling or weighting information available with the study.

Summary statistics (minimum, maximum, arithmetic mean, median, mode, and standard deviation) may not be available for every variable in the codebook. Conversely, a listing of frequencies in table format may not be present for every variable in the codebook either. However, all variables in the dataset are present and display sufficient information about each variable. These decisions are made intentionally and are at the discretion of the archive producing this codebook.

VERSION: Version of ANES 2020 Time Series Release

Value	Label	Unweighted Frequency	%
ANES2020TimeSeries_20210324	-	8280	100.0 %
	Total	8,280	100%

Based upon 8,280 valid cases out of 8,280 total cases.

Location: 1-27 (width: 27; decimal: 0)

Variable Type: character

V200001: 2020 Case ID

Based upon 8,280 valid cases out of 8,280 total cases.

- Mean: 339612.02
- Minimum: 200015.00
- Maximum: 535469.00
- Standard Deviation: 103628.23

Location: 28-33 (width: 6; decimal: 0)

Variable Type: numeric

Please note that only the first 50 response categories are displayed in the PDF codebook. To view all response categories, please analyze the data file in the statistical package of your choice (SAS, SPSS, Stata, R).

Based upon 8,280 valid cases out of 8,280 total cases.

- Mean: 129813.41
- Minimum: -1.00
- Maximum: 407796.00
- Standard Deviation: 181583.43

Location: 34-39 (width: 6; decimal: 0)

Variable Type: numeric

V200002: Mode of interview: pre-election interview

Value	Label	Unweighted Frequency	%
1	1. Video	359	4.3 %
2	2. Telephone	139	1.7 %
3	3. Web	7782	94.0 %
Total		8,280	100%

Based upon 8,280 valid cases out of 8,280 total cases.

- Minimum: 1.00
- Maximum: 3.00

Location: 40-40 (width: 1; decimal: 0)

Variable Type: numeric

V200003: Sample type

Value	Label	Unweighted Frequency	%
2	2. ANES 2016-2020 Panel	2839	34.3 %
3	3. 3Ar1 Fresh sample: web only, replicate 1	977	11.8 %
4	4. 3Ar2 Fresh sample: web only, replicate 2	1306	15.8 %
5	5. 3B Fresh sample: web or phone	2407	29.1 %
6	6. 3C Fresh sample: video, web, or phone	751	9.1 %
Total		8,280	100%

Based upon 8,280 valid cases out of 8,280 total cases.

- Minimum: 2.00
- Maximum: 6.00

Location: 41-41 (width: 1; decimal: 0)

Variable Type: numeric

V200004: Completed pre only, post only, or completed pre and post interviews

Value	Label	Unweighted Frequency	%
-2	-2. Data will be available as part of the full 2020 Time Series release	8280	100.0 %
Total		8,280	100%

Based upon 8,280 valid cases out of 8,280 total cases.

- Minimum: -2.00
- Maximum: -2.00

Location: 42-43 (width: 2; decimal: 0)

Variable Type: numeric

V200005: Eligibility concerns flag

Value	Label	Unweighted Frequency	%
0	0. No special concern	7146	86.3 %
1	1. Some concern (possible substitution)	885	10.7 %
2	2. High concern (likely substitution)	240	2.9 %
3	3. Highest concern (evident substitution)	9	0.1 %
Total		8,280	100%

Based upon 8,280 valid cases out of 8,280 total cases.

- Minimum: 0.00
- Maximum: 3.00

Location: 44-44 (width: 1; decimal: 0)

Variable Type: numeric

V200010A: Full sample pre-election weight (DRAFT)

Based upon 8,280 valid cases out of 8,280 total cases.
