ICPSR PROCESSING NOTES FOR #37970

2017 Chicago Council Survey of American Public Opinion on US Foreign Policy

1. **Confidentiality/Disclosure Risk:** In order to protect respondent anonymity and prevent disclosure risk, ICPSR has recoded the following variables:

   - **LATITUDE, LONGITUDE, PRECISION, CENSUS_BLOCK, XCBSAMET**, and **XZIP** have been replaced with "Masked by ICPSR".
   - **Q2B_FOLLOWUP** has had local names replaced with "[Masked by ICPSR]".
   - **PPEDUC** has been bottom coded at "6th grade or lower".
   - **PPT01** ("2 and up"), **PPT612** ("4 and up"), **PPT18OV** ("7 and up"), and **PPAGE** ("85 and up") have been top coded.

2. **Qualitative Data File:** The variable **Q2B_FOLLOWUP** was exported to a common delimited (CSV) file which is available for download and can be linked to the dataset via the CASEID variable.

3. **Additional Information:**

   - For additional information on the 2017 Chicago Council Survey on American Public Opinion and US Foreign Policy, please visit the Chicago Council on Global Affairs website.
   - Please note that the P.I. documentation can be accessed via the "Full Study Documentation" link.

Variable Description and Frequencies

Note: Frequencies displayed for the variables are not weighted. They are purely descriptive and may not be representative of the study population. Please review any sampling or weighting information available with the study.

Summary statistics (minimum, maximum, arithmetic mean, median, mode, and standard deviation) may not be available for every variable in the codebook. Conversely, a listing of frequencies in table format may not be present for every variable in the codebook either. However, all variables in the dataset are present and display sufficient information about each variable. These decisions are made intentionally and are at the discretion of the archive producing this codebook.
